

PRERAN KUMAR K R

AI/ML Engineer | UI/UX | Animation | Graphics | Creative Technology

Email: prerankr7@gmail.com | **Phone:** +91 8073298655 | **GitHub:** github.com/crazy1437

LinkedIn: linkedin.com/in/preran-kumar | **Portfolio:** preran-kumar.dev

PROFILE

Multidisciplinary AI/ML engineer with a strong foundation in machine learning, computer vision, UI/UX, animation, graphics, and VFX. I enjoy turning technical ideas into visually compelling and user-centered digital experiences that combine engineering thinking with creative expression.

CORE SKILLS

AI / ML: Machine Learning, Deep Learning, Model Exploration, Data-Driven Experimentation

Computer Vision: Image Processing, Visual Analysis, Vision Workflows, Experimentation

UI / UX: Figma, FigJam, Wireframing, Prototyping, UX Design, Interface Design

Animation / Graphics: Motion Design, Graphics, Visual Design, VFX, Creative Storytelling

Creative Technology: Generative AI, Creative AI, Interactive Experiences, Design Systems

EDUCATION

B.Tech / Engineering in Artificial Intelligence & Machine Learning

Focused on intelligent systems, emerging technologies, and practical problem solving.

M.Sc in Animation, Graphics & VFX

Specialization: UI/UX

Emphasis on motion design, visual communication, and digital storytelling.

EXPERIENCE

ML Engineer Intern | Cocos Innovative Pvt Ltd

Worked on machine learning exploration, applied experimentation, and learning in a professional technical environment. Gained exposure to AI workflows, data-driven problem solving, and how creative technology can be translated into usable systems.

PROJECTS

Vision-Driven ML Prototype

Explored computer vision and machine learning workflows to build visual interpretation systems with interactive potential.

Creative AI Interface Study

Designed and prototyped AI-driven interfaces focused on usability, aesthetics, and immersive storytelling.

Motion + Visual Experiment

Created cinematic visual studies using motion, graphics, and composition to enhance digital storytelling.

STRENGTHS

- Creative problem solving
- Research-oriented mindset
- Quick learner and adaptive
- Technical + design thinking
- Visual communication and experimentation

CAREER INTERESTS

- AI/ML internships and product roles
- Computer vision and data-driven innovation
- UI/UX for intelligent systems
- Creative technology and digital experiences

PERSONAL TRAITS

- Curious and research-driven
- Visual and detail-oriented
- Collaborative and adaptive
- Capable of bridging technology and creativity
